WHAT ARE HYALURONIC ACID (HA) INJECTABLES?

HA is naturally present in the skin.^{1,2} When surrounded by water, it binds to a large number of water molecules, creating a network-like structure that helps to hydrate and replenish moisture.^{1,2}

HA that occurs naturally in the skin is broken down and renewed within a day or two.² However, we lose HA as we get older, which can contribute to visible signs of aging such as wrinkles, dryness, and hollowing.^{3,4}

HA injectables are designed to help the skin stay hydrated, smooth, and supple for longer.^{2,3}

WHAT MAKES RESTYLANE UNIQUE AMONG HA INJECTABLES?

Since 1996, Restylane has been the **pioneer** in the HA injectables category, offering a premium product uniquely formulated with Galderma's pure, high molecular weight HA.⁵⁻⁷ **This formulation closely mimics the skin's naturally occurring HA**, matching its molecular weight to work in sync with the skin for a more natural look and feel.^{2,7,8}

With long HA chains and the lowest degree of modification (<1%) Restylane has excellent biocompatibility, resulting in a product that closely resembles natural HA and integrates seamlessly into the skin.⁹⁻¹¹

This means results that look **natural**, moving with your facial expressions.¹²⁻¹⁷ Restylane is the only HA injectable offering **four distinct gel formulations** – NASHA®, NASHA HD™, SB-NASHA, and OBT™ – to deliver **personalized** results that go beyond volumizing, providing structure, shape, and hydration.¹⁸⁻²¹

FOUR UNIQUE TECHNOLOGIES FOR TAILORED RESULTS

The firmest gel on the market with the highest G' (a measure of firmness) producing a bone mimicking effect.¹⁹ The next generation in HA science with the first HA shaper technology designed for the lower face.^{18,19,22}

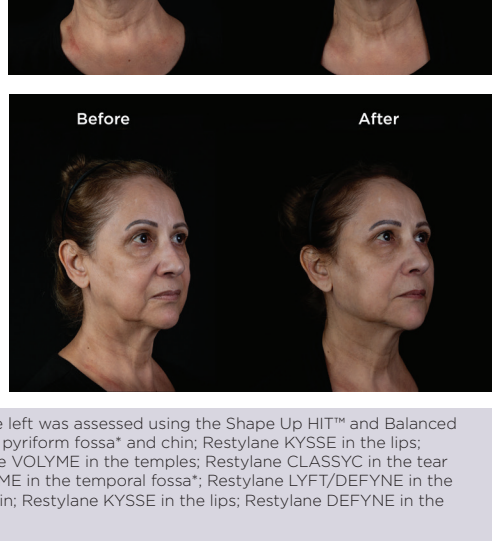

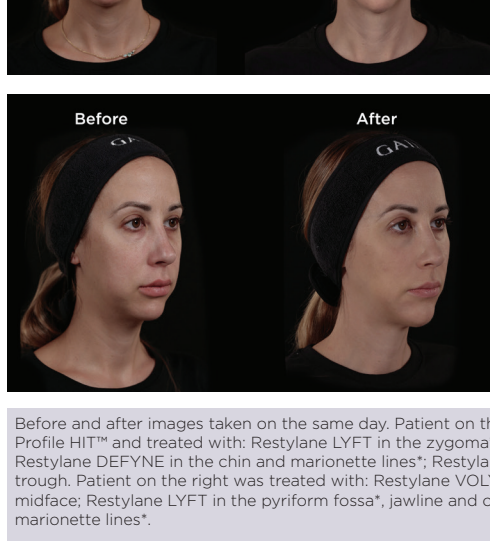

A collection of firm (high G') gels to **provide structure and lift**, achieving precise and targeted results.^{18,20,23-25}

A collection of soft and flexible gels each tailored to and optimized for specific facial areas. **Clinically proven gel** that moves with natural facial expressions.^{14,15,26}

Microdroplets of gel that mimic natural HA to enhance the skin from within without changing facial features. With its high molecular weight and very small HA particle size, SB-NASHA enhances key aspects of skin quality for healthy glowing skin.^{21,27-33}

Before and after images taken on the same day. Patient on the left was assessed using the Shape Up HIT™ and Balanced Profile HIT™ and treated with: Restylane LYFT in the zygoma*, pyriform fossa* and chin; Restylane KYSE in the lips; Restylane DEFYNE in the chin and marionette lines*; Restylane VOLUME in the temples; Restylane CLASSYC in the tear trough. Patient on the right was treated with: Restylane VOLUME in the temporal fossa*; Restylane LYFT/DEFYNE in the midface; Restylane LYFT in the pyriform fossa*, jawline and chin; Restylane KYSE in the lips; Restylane DEFYNE in the marionette lines*.

*Zygoma = cheekbone, pyriform fossa = pyriform sinus, marionette lines = wrinkles running vertically from the corner of the mouth down to the chin; temporal fossa = temple.

HA INJECTABLES DELIVER:

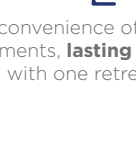

100% natural-looking results in motion and at rest.^{14-17,34}

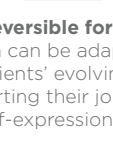

Reliable results due to its lower water uptake, creating a refreshed, hydrated look.^{21,27,36,37}

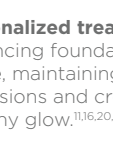

High patient satisfaction with less product needed.^{26,34,37-39}

The convenience of fewer retreatments, **lasting up to 24 months** with one retreatment.⁴⁰

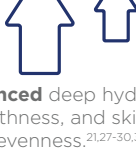

A **reversible formula**, which can be adapted to suit patients' evolving needs, supporting their journey of self-expression.^{5,41,42}

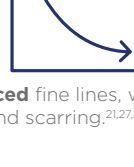

Personalized treatment: enhancing foundation or structure, maintaining dynamic expressions and creating a healthy glow.^{11,16,20,22-25,27,29}

SKIN QUALITY INJECTABLES DELIVER:

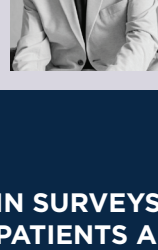

Enhanced deep hydration, smoothness, and skin tone evenness.^{21,27-30,33}

Reduced fine lines, wrinkles and scarring.^{21,27,29,30}

DON'T JUST TAKE OUR WORD FOR IT. HERE'S WHAT CLINICIANS AND RESTYLANE PATIENTS HAD TO SAY:

"With Restylane, I can achieve subtle, natural-looking results for my patients using less product. The gels integrate beautifully with the skin, so results look smooth and natural - not puffy or frozen. It stays where I place it, so there's no shifting. It just works well with their face, not against it."

Dr. Kuldeep Minocha,
Aesthetic Physician, L'ART by Dr M

IN SURVEYS OF RESTYLANE PATIENTS AND ASSESSMENTS OF PATIENTS AND HEALTHCARE PROFESSIONALS DURING CLINICAL STUDIES:

100%

found the overall appearance of their face looked natural.¹⁵

• **96%** felt treatment met or exceeded expectations.³⁷

95%

had maintained or enhanced naturalness of their facial expressions after treatment.¹⁴

99%

of those who received treatment would recommend it to a friend.³⁷

UNMATCHED SAFETY AND TRUST

Restylane's safety and efficacy is backed by decades of data and real patient experiences:

30yrs

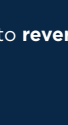

Almost three decades of published safety data.^{5,43}

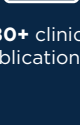

Over **77 million** treatments worldwide.⁶

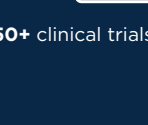

418,000+ patients evaluated in clinical studies.⁴²

Easy to **reverse**.^{5,41,42}

180+ clinical publications.⁴³

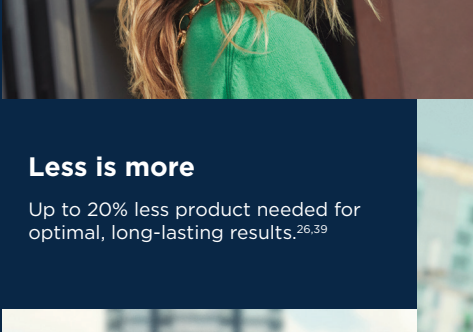

50+ clinical trials.⁴³

WHY USE RESTYLANE?

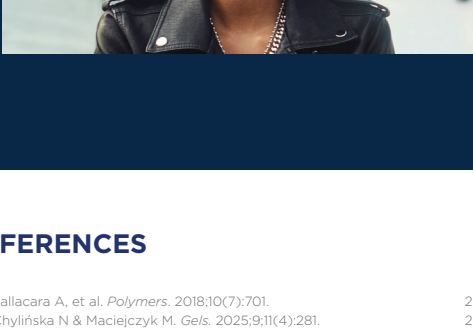

Undetectable aesthetics

Restylane delivers results that look and feel natural.^{14,15,17}

Less is more

Up to 20% less product needed for optimal, long-lasting results.^{26,39}

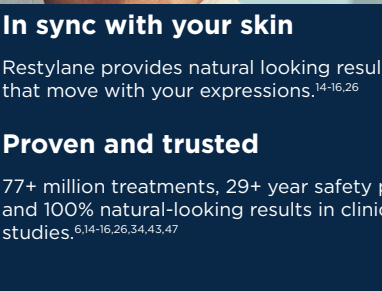

Designed differently

With a selection of HA technologies and a variety of gel formulations, Restylane is built for precision, safety, and natural beauty.^{5,12,13,16-25,32,33,44-46}

Beyond volumizing

Restylane's formulations provide foundation, structure, dynamic expressions, and a healthy glow.^{11,16,20,22-25,27-29,31,33}

In sync with your skin

Restylane provides natural looking results, that move with your expressions.^{14-16,26}

Proven and trusted

77+ million treatments, 29+ year safety profile, and 100% natural-looking results in clinical studies.^{6,14-16,26,34,43,47}
